

FAN CLEANING STEPS

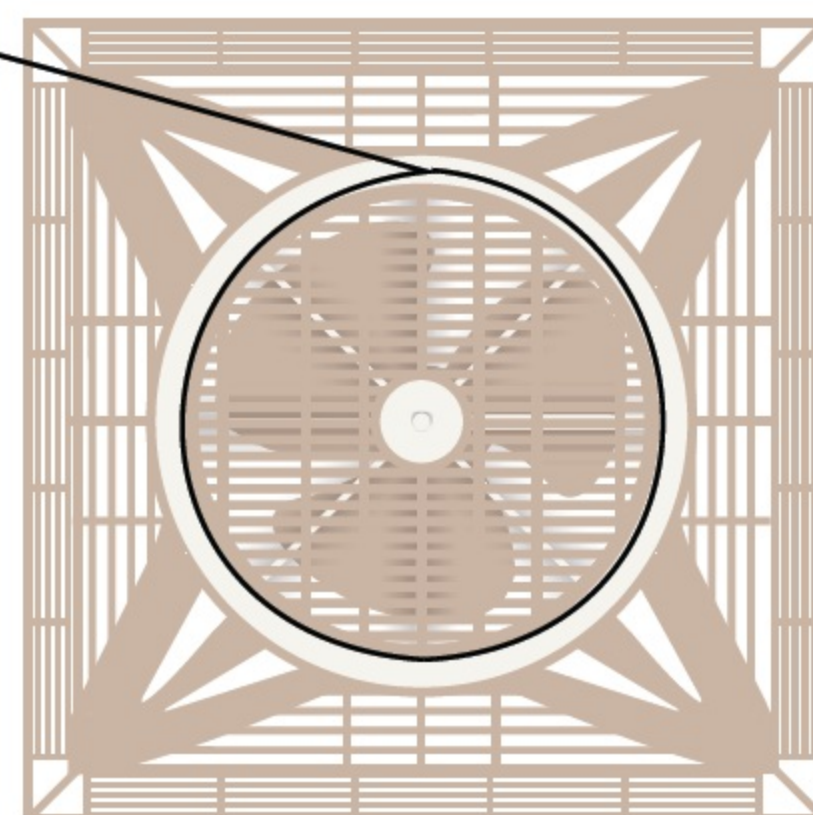

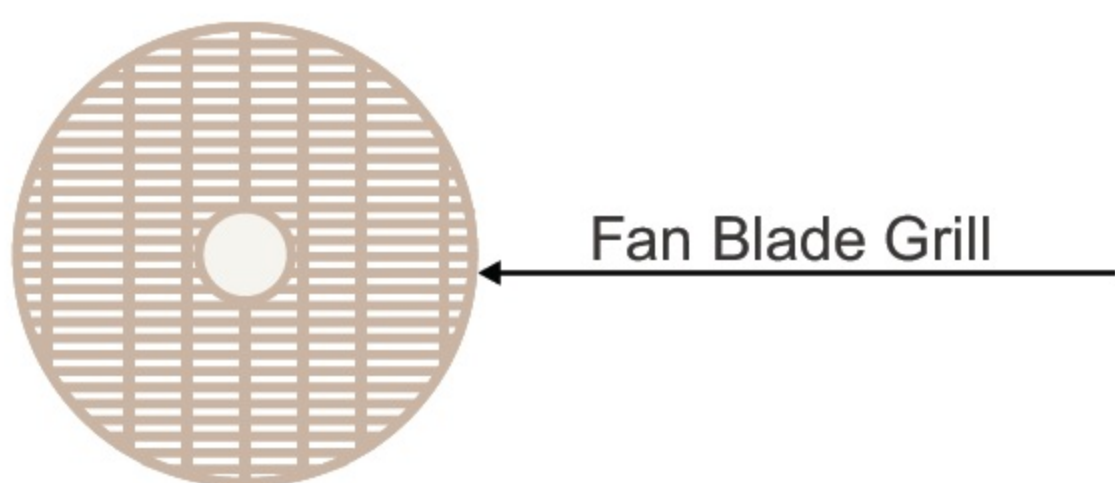

1. Twist open the Fan hub Cap.

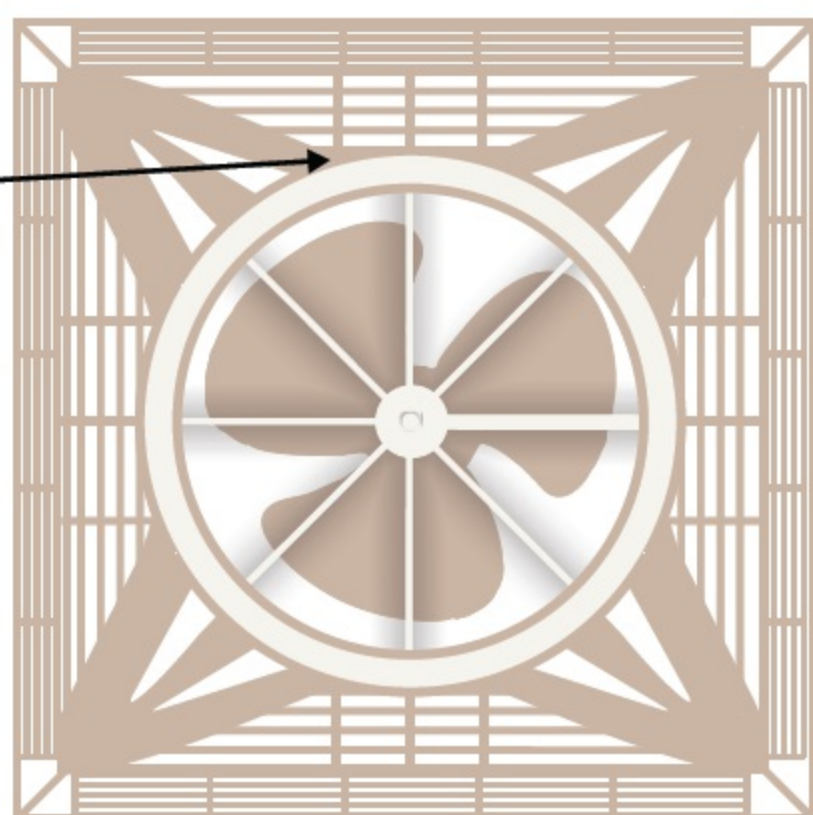

2. Undo the Screws with a screwdriver.

3. Pull down the Fan blade Grill.

4. Clean the Dust & Dirt from the Fan blade and other Non-Electrical parts using a dry cloth.

5. After cleaning the Fan, re-assemble the Fan blade grill and tighten the Screws with a screwdriver.

6. After fixing the Fan blade grill, replace the fan hub cap.

Note: water or any other cleaning liquid should not go inside the Fan Motor or any other electrical parts, it may Cause Electrical short circuit or other damage.

Clean the fan with a dry cloth or with a mild wetted cloth followed by a dry cloth rub. Ensure no moisture remains on the fan after cleaning.
